WRIGHT'S INDIAN VECETABLE PILLS

And all Billous Complaints

NEVER CAME BACK.

llow George Washington Punished an Annoying Treapassee.

George Washington was always ready for a fox hunt. As ln his younger days he had ridden with Lord Fairfax and the Fairfaxes of Belvoir, so later, wh r he was master of Mount Vernon, he and his friends were always out in the season, and when night came, the party would meet at one house or the other, for a merry supper, to be off again behind the hounds early the next day.

In a letter describing Mourt Vernon. Washington speaks of it as "on one of the finest rivers in the world; a river well stocked with various kinds of fish, at all seasons of the year. 'The borders of the estate were washed by ten miles of tide-water, and the whole shore was one entire fishery. In the season of canvas-back ducks, also, Wrshlagton was out with his fowling-pieco early and late. The slory is that he had been much annoyed by a lawless fellow, who came without leave to shoot on the estate. He came over from the Maryland shore, and hid his boat in one of the creeks. One day Washington heard the report of a gun, and guessing it to be that of this man, who had more than once been warned to leave, he sprang on his horse and rode in the direction of the sound. He pushed his way through the bushes just as the man, who had seen him up-pruach, was pushing his boat off. The preach, was pushing his boat off. poacher raised his gun, and aimed It at Washington, who spurred his horse at onee Inlo the water and seized the boat before the man knew what he was Then Washington, who had a powerful arm, selzed the fellow and gave him a sound thrashing, and was never troubled by him ag.in. - Horace P. Sculder, in St. Nicholas.

SHEEP STORIES.

How Lillie Lambs Ace Mystified by Thele Shoen Mothers.

James Hogg, the shepherd poet, has related many interesting incidents in his experience. Among these is that the sheep's sense of hearing is so acute that she can distinguish the ery of her own lamh among a thousand others all bleating at the same time; and the lamb is able to recognize its mother's voice, even though it be in the midst of a large

In relation to the mystification of the lambs over their dams after the latter had been shown, he says while the sheep were being shorn, the lambs would be put into a fold by themselves, and the former be sent to join their little ones as soon as the operation of shearing was over. The moment a lamb heard its mother's voice it would hasten from the crowd to meet her. Instead of finding the "rough, well-clad mamma," which it had left a short time before, it would meet a strange and most deplorable creature. At the sight of this it would wheel about, uttering a most piteous cry of despair. Soon, however, the sheep's voice was heard again; the lamb would thereupon return, then once more bound away, and sometimes repeat this conduct for ten or a dozen times before it fully understood that the shorn ewe was in reality its mother .-Farm, Field and Stockman.

Awful If True.

"We are selling a good many false bangs," said a hair-dresser.

"For ladies?" Inquired the reporter. "No, for young men. Bangs are all the rage now, and every young fellow must have one. Many of them are bald, or their hair is too thin on the forehead, so they eall on us to help them. We make a bang that can not be distinguished from the genuine article. It is fastened on with wires, and when neatly combed looks very niee. A bang should come about half an inch short of the eye-brows, and should be evenly ent. It should never be worn with full beard, as It contracts the face too much. It is most effective with a drooping moustache."--N. Y. Sun.
